QUALITY & PRODUCTION

At Motto, we believe that quality is the cornerstone of every surface we produce. Our dedicated team of experts meticulously selects the finest materials, ensuring that each surface meets our rigorous standards. We go above and beyond to deliver surfaces that not only enhance the aesthetic appeal of any space but also stand the test of time.

Our advanced production facility is equipped with the latest technology and machinery to ensure that each surface is manufactured with precision and efficiency. From the

initial design stage to the final production process, we prioritize accuracy and attention to detail. Our skilled craftsmen work tirelessly to create surfaces that are not only visually stunning but also durable and long-lasting.

In our manufacturing phase, we utilize contemporary technology and machinery to ensure precise and consistent surface production. Our team closely monitors each step of the manufacturing process to guarantee that our surfaces meet the highest quality standards.

APPLICATION

As we know that our collection is widely used in different application areas, it's our priority that all the qualities are matched before it finally used.

EXOTIC SURFACES

If you're looking for a more natural and earthy feel, our Surfaces collection offers a range of options, including a matt surface for a subtle texture, a SPA surface for a relaxing atmosphere, and a glossy surface for a luxurious touch. Each option provides a unique aesthetic that can enhance the ambiance of any room.

TYPE OF SURFACES

1. HYBRID

2. GLOSSY

3. HIGH GLOSS

4. SPA

5. SPA 3.0

6. GHR

7. MATT

Whether you prefer a sleek and modern look with the glossy surface or a more subdued feel with the matt finish, Our Surfaces has options to suit any taste. And for those looking to add a touch of luxury to their space, the SPA surface offers a unique and sophisticated texture.

WORKING WITH THE VARIOUS VERSIONS OF
SLAB

CUTTING WITH DIAMOND DISCS

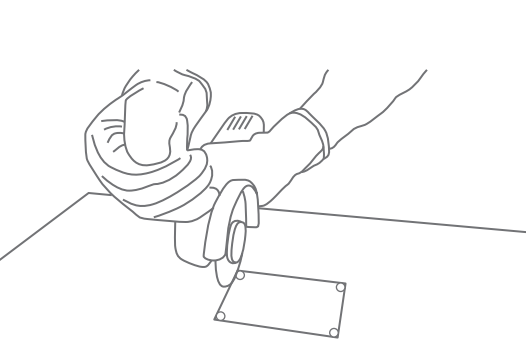

Our products can be cut using diamond discs fitted onto the hand-held electrical grinding machine. The speed of Disc rotation must be high (>10000 RPM) and should have a low feed rate (< 1 m/min). It may be required to cool the disc with water. Recommended discs are the thin types generally used for cutting porcelain stoneware. The surface should be kept on a FLAT base while cutting without any gap underneath.

DRILLING

You can use cutting discs fitted to battery-operated screwdrivers or angle grinders, or electrical drills as an alternative.

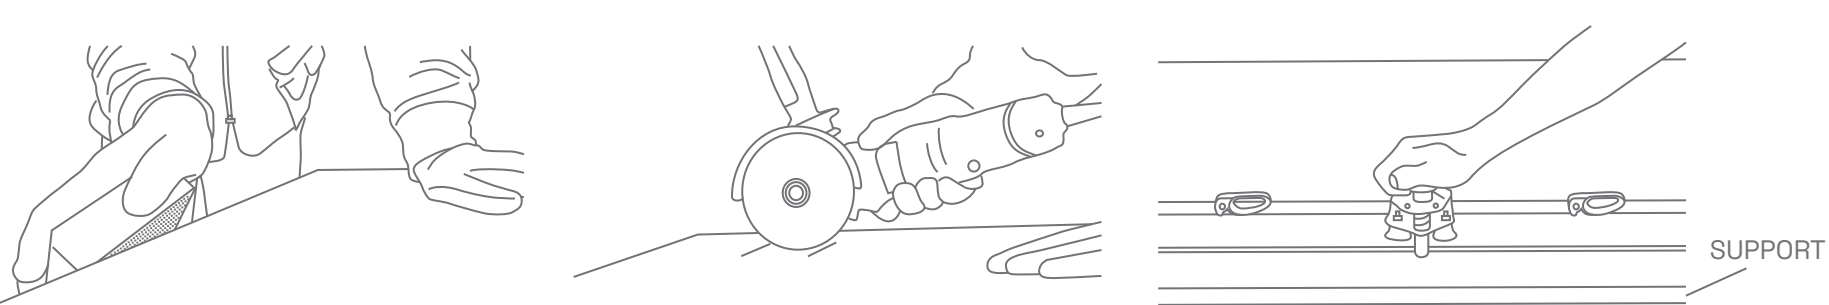

INTERNAL CUT/L-SHAPED CUT

To get internal and L-shaped corners & to reduce the risk of breakage, cut 'o' at the vertex of the internal corners using bits with a radius of at least 5mm. Then cut with diamond discs, be cautious to stop moving the cutting tool forward. To drill and cut using diamond discs, and more follow the instructions provided below:

- When using these tools:
- Cool the point being drilled with water
 - Don't put too much pressure and bear in mind the resistance of the type of laminated stoneware you are working on
 - If you are using tungsten bits, start drilling at a low speed
 - If you are using drills or screwdrivers, do not select hammering mode

EDGE-FINISHING

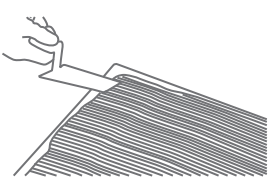

INSTRUCTIONS FOR MANUAL INSTALLATION

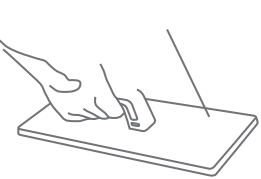

SINGLE LAYER METHOD

DOUBLE-LAYER METHOD

COMPRESSING THE SLAB

IMPORTANT

All cutout corners must have a minimum diameter of 1/4". Never leave 90° angles. We recommend a radius of more than 1/4" when the kitchen design allows as it makes the countertop firmer.

✗ INCORRECT

CLEANING & MAINTENANCE

Our products are non porous (due to their high quality raw materials, stringent production parameters and state of the art technology), hence any dust or deposited waste cannot penetrate the surface.

For most cases only a damp cloth is sufficient for cleaning.

Regular cleaning highlights the aesthetic features of the surface and gives it exceptional shine.

For highly aggressive cleaning caused by some common food and substances follow the table below.

TYPE OF STAIN	CHEMICAL PRODUCT	EXAMPLE
Grease	Alkaline - Solvent	Detergent
Oil	Solvent	Ammonia, Baking Soda
Ink	Oxidant - Solvent	Alcohol, Liquid Bleach, Nail Paint Remover
Rust	Acid	Hydrochloric Acid, Vinegar, Red Harpic
Lime	Acid	Descaling Agents, Hydrochloric Acid
Cement	Acid	Hydrochloric Acid
Wine	Alkaline	Ammonia, Liquid Bleach
Coffee	Alkaline - Solvent	Ammonia, Liquid Bleach
Rubber	Solvent	Alcohol, Thinner
Plaster	Acid	Hydrochloric Acid
Candle Wax	Solvent	Alcohol, Thinner
Iodine	Oxidant	Liquid Bleach
Blood	Oxidant	Liquid Bleach
Ice Cream	Alkaline	Liquid Bleach

Note: It is recommended that any kind of stain needs to be cleaned immediately, as soon as possible.
